## EDUCATION

**University of Professional Studies** **Accra, Ghana**
*BSc in Information Technology Management* June 2025
**Relevant Coursework:** Database Management, Operating Systems, Network and System Administration, IT Implementation and Maintenance, Software Quality.

## SKILLS

**Technologies/Methodologies:** React, HTML, CSS, JavaScript, TypeScript, Node.js, Express, REST APIs, SQL, SQLite, MongoDB, IndexedDB, Excel, Google Cloud, Power BI, Data Analysis, IT Support, Troubleshooting, Ticket Management.

## EXPERIENCE

**NCR Atleos Ghana** **Accra, Ghana**
*Operations Coordinator* January 2026 – Present
- Coordinate ATM service requests and generate engineer work tickets, supporting timely resolution of ATM incidents.
- Liaise with custodians across multiple banks, document and prioritize incidents, track maintenance, and maintain service records for reporting.

**Agricultural Development Bank** **Accra, Ghana**
*IT Help Desk Intern | IT Department* July 2023 – August 2023
- Provided first-line hardware, software, and network support to staff, resolving 20+ user issues daily.
- Logged, prioritized, and tracked support requests using help desk ticketing systems.

## PROJECTS

***HelpDesk Pro – IT Support Ticketing App*** 2026
- Built a role-based ticketing app for a fictional bank: employees submit and track requests; IT staff assign tickets, set priorities, update status, review analytics, and export CSV reports.

**Stack:** React, TypeScript, Vite, Node.js, Express, SQLite | Live Demo | GitHub

***WCS ATM Maintenance Tracker*** 2026
- Created an offline tracker that imports Excel/CSV schedules and records ATM visits, engineer reports, work status, customer packets, confirmations, and outstanding follow-ups; includes export, print, and backup tools.

**Stack:** HTML, CSS, JavaScript, IndexedDB | GitHub

***Fitness Tracker App*** January 2026
- Designed a gamified fitness web app with workout and calorie tracking, progress metrics, streaks, levels, and reward badges.

***SQL Retail Sales Database Analysis*** April 2025
- Analyzed relational retail data with joins, CTEs, subqueries, aggregates, and window functions to report on revenue, sales, customers, and product trends.

## LEADERSHIP

**Leadership/Organizations:** UPSA IT Club member; NCR Atleos Training and Development Supervisor (Interns).
