EDUCATION

University of Professional Studies **Accra, Ghana**
Bachelors in Science in Information Technology Management *June 2025*
Relevant Coursework: Database management, Operating Systems, Network and System Administration,, Information Technology Implementation and Maintenance , Software Quality

SKILLS

Technologies/Methodologies: Excel, Google Cloud, MongoDB, RESTAPI, Restful, Power BI, SQL, Data Analysis, AI-Assisted Web Development Front-End Development (React, TypeScript), Back-End Development (Node.js, Express), Database Management (SQLite)

EXPERIENCE

Agricultural Development Bank **Accra, Ghana**
IT help Desk Intern| IT Department July 2023 – August 2023
- Provided first-line technical support to staff, resolving hardware, software, and network issues.
- Resolved 20+ user issues daily, improving system uptime and productivity.
- Logged and tracked support requests using help desk ticketing systems, improved response time by efficiently prioritizing and managing support tickets

NCR Atleos Ghana **Accra, Ghana**
Operations Coordinator January 2026 – November 2026
- Coordinated service requests and generated work tickets for engineers to facilitate timely resolution of ATM-related incidents.
- Liaised with ATM custodians across multiple banks to monitor issue progress, gather updates, and ensure effective communication between stakeholders.
- Provided operational support to engineers by gathering incident details, documenting service requests, prioritizing issues, and communicating status updates to relevant parties.
- Assisted in tracking maintenance activities, updating service records, and ensuring accurate documentation of completed tasks
- Maintained records of ATM incidents and resolutions to support efficient workflow management and reporting.

PROJECTS

Fitness Tracker App **January 2026**
- Designed and developed a gamified fitness tracking web application that encourages consistent workouts through a points, streaks, and achievement system..
- Implemented user activity tracking features for workouts, calories burned, and progress metrics to improve user engagement and fitness consistency
- Built a structured database system to store user workout history, enabling real-time progress tracking and performance analysis over time.
- Integrated gamification mechanics such as daily streaks, level progression, and reward badges, increasing user motivation and retention.

SQL Retail Sales Database Analysis **April 2025**
- Designed and analyzed a relational retail sales database containing customer, product, order, payment, supplier, and staff data.
- Wrote advanced SQL queries using JOINs, CTEs, subqueries, aggregate functions, and window functions to solve business problems.
- Produced insights on sales performance, customer behavior, product trends, and revenue through data analysis.
- Optimized queries and demonstrated strong database querying and analytical skills using SQL.

HelpDesk Pro — IT Help Desk Ticket Management System **|** Link **October 2025**
- Developed a full-stack IT support web application with role-based authentication for employees, IT agents, and administrators.
- Implemented ticket creation, assignment, search, filtering, and priority and status management.
- Integrated a SQLite database for persistent ticket storage and management.
- Built dashboard analytics and CSV export functionality for ticket reporting.
- Leveraged ChatGPT for AI-assisted coding, debugging, and feature implementation.
